Education

Bachelor of Science in Geology and Geography January 2023 - Present

University of Florida College of Liberal Arts and Sciences - Gainesville, FL

- Proposed and conducted field research collecting detrital zircons for U-Pb geochronology of the Alaskan Brooks Range. Title: "Characterization of the structural and stratigraphic relationships across the northern boundary of the high-pressure terrane in the Brooks Range orogen of northern Alaska" (Project ongoing)
- University Scholars Program — Awarded funding and platform to present research at symposium and in UF Journal of Undergraduate Research.

Associate of Arts December 2023

Sante Fe College - Gainesville, FL

Undergraduate Certificate January 2023 - Present

University of Florida - Gainesville, FL

- GeoAI: Geographic Artificial Intelligence and Big Data
- Developed transferable skills applying AI to geospatial challenges, addressing environmental and societal issues

Skills

Management Skills: Project management, proposal writing, research methodology, oral and written communication

Technical Skills: Data collection, data management, spacial analysis (ArcGIS Pro), remote sensing (GEE), statisical analysis (SPSS, GeoDa, R Software, Excel), mass spectrometry analysis

Fieldwork Skills: geological mapping, lithostratigraphic correlation & logging

Research Interests

Volcanology and Igneous Petrology, structures and processes of mantle plumes, mantle sources of plume magmatism, plume generation, magma dynamics, eruption forecasting, eruption indicators, volcanic hazards, GIS-based volcanic hazard mapping/monitoring

Experience

President, Beta Psi Chapter of Sigma Gamma Epsilon August 2025-Present

University of Florida - Gainesville, FL

- Serve as the chief executive officer of the chapter; preside over meetings and guide chapter activities in alignment with the mission of Sigma Gamma Epsilon.
- Oversee officer roles (Vice President, Secretary, Treasurer) and delegate responsibilities to ensure efficient chapter operation.
- Encourage scholarly activities, support student research dissemination, and connect members with professional opportunities in geology and geography.
- Prepare agendas, lead chapter meetings, and ensure parliamentary procedures or chapter bylaws are followed.

Toxicology Lab Aquaculturist October 2023-October 2024

EcoAnalysts - Alachua, FL

- Maintained and monitored aquatic organisms for use in enviromental toxin tests.
- Operated and maintained laboratory aquaculture systems, instrumentation, and life support equipment.
- Monitored and recorded data, including water quality parameters and organism responses, supporting optimal organism production and health.
- Ensured compliance with laboratory safety protocols and ethical standards for animal care.
